

OVERSIGHT & INVESTIGATION

ASSESS RISKS. TAKE PREEMPTIVE ACTION. RESPOND STRATEGICALLY.

Congressional and Executive Branch oversight can create significant operational, financial, and reputational risks for organizations and their leaders. Through our expertise, Venn Strategies helps clients anticipate emerging scrutiny, assess potential exposure, prepare leadership and internal teams, and navigate inquiries when they arise.

Drawing on decades of experience across all facets of federal oversight prerogatives, our team understands how oversight priorities develop, how investigations unfold, and what drives and influences government decision-making. We help clients align political strategy with legal, communications, and operational considerations so they can respond effectively before a potential issue becomes a crisis.
